

4/2-way high-pressure block ball valve HBVP-C, HBVP-D, steel

For manifold installation

DN 6 - 25 mm PN max. 500 bar

Also available in stainless steel.

Temperature range -10°C to +90°C
-50°C to +250°C

Range of use Liquids: Liquids group 1 and 2 according to PED 2014/68/EU Article 13
Gases: Liquids group 1 and 2 according to PED 2014/68/EU Article 13
As a matter of principle, the resistance to the flow medium must be ensured.

Technical specification The HBVP-C type ball valve has been specially developed for installation on control blocks. The need to use hoses or piping can be avoided through direct flanging on to the control block. Actuators can be attached by means of an assembly kit. This retrofitment requirement must be specified when placing the order (additional charge).

Dimensions and parts list on request.

Please ask separately, where requirements exceed the standard conditions of use listed in this data sheet,
As a matter of principle, the operating and maintenance instructions, in particular the safety instructions must be observed!
Operating and maintenance instructions as well as the approval certificates can be downloaded at www.von-scheven.de.

We reserve the right to carry out technical modifications.
